

What is claimed is:

1. A multi-purpose vehicle cover comprising:

a roof cover portion having a pair of opposed side  
5 edges, said roof cover portion having a front edge and a  
rear edge;

a side wing connected to each side edge of the roof  
cover portion;

a front flap extending from said front edge of the  
10 roof cover portion; and,

a rear flap extending from said rear edge of the roof  
cover portion.

2. The multi-purpose vehicle cover as described in Claim 1  
15 further comprising a first band of fabric material attached  
between the roof cover portion and the front flap; and,

a second band of fabric material attached between the  
roof cover portion and the rear flap.

20 3. The multi-purpose vehicle cover as described in Claim  
1 wherein the roof cover portion, the side wings and the  
front flap and rear flap are each formed of a compound  
resin sheet having a layer of air filled material disposed  
between an upper and a lower sheet of film material.

25

4. The vehicle cover of claim 1 further comprising:

an extension flap connected to each side edge of the front flap; and,

an extension flap connected to each side edge of the rear flap.

5

5. The vehicle cover of claim 4 further comprising an opening formed in a corner of each extension flap for connection to a canopy pole.

10 6. The vehicle cover of claim 1 further comprising a third band of fabric attached to a front edge of the front flap and a fourth band of fabric attached to a front edge of the rear flap; an elastic string extending from each end of said third and fourth fabric bands; each elastic string  
15 ending in a hooking member connected thereto.

7. The vehicle cover of claim 1 further comprising a magnetic material disposed on each corner of said roof cover portion.

20

8. The vehicle cover as described in claim 1 wherein said side wings are detachably connected to each side edge of the roof cover portion.

25 9. The multi-purpose vehicle cover as described in Claim 8 wherein a first patch of loop pile members are attached

along the opposed side edges of the roof cover portion; a patch of hooking members are attached along an edge of the side wings for detachable connection to the corresponding patch of loop pile members of the roof cover portion.

5

10. The multi-purpose vehicle cover as described in Claim 8 wherein a first track of zipper member is attached along the opposed side edges of the roof cover portion; a second track of zipper member is attached along an edge of the side wings for detachable connection to the corresponding first track of zipper member of the roof cover portion.
